L5300

Industrial Hand-held Wood Moisture Meter

L722

Lumber Stack Probe

Rugged, reliable, and built for demanding lumber operations, the L5300 delivers accurate moisture readings up to 1 inch deep. Its histogram display reveals moisture variation at a glance, while the optional L722 Stack Probe detects hidden moisture deep within stickered stacks.

Includes USB/Bluetooth connectivity for advanced analysis with WoodStat Pro™ software.

- Customizable Species Settings
- Extensive Reading Capacity
- On-Demand Calibration
- Auto & Continuous Reading Modes

Leveraging Wagner's patented technology, the L722 Lumber Stack Probe delivers highly accurate moisture readings deep within stickered lumber stacks.

Unlike conventional methods, Wagner Meters measures the moisture in the wood, virtually unaffected by surface moisture, ensuring unparalleled reliability and precision.

- Designed for harsh industrial environments
- Available in 40-inch or 26-inch lengths
- Accurately measures moisture levels deep within lumber stacks
- Reduces lumber waste and improves sawmill efficiency

L5300 Moisture Meter and L722 Stack Probe Combo

With a reading depth of 1 inch, the L5300 integrates seamlessly with the L722 Lumber Stack Probe, allowing users to detect moisture deep within stickerered stacks, which is crucial for identifying inconsistencies that may affect product quality.

The meter stores up to 100 groups with 1,000 readings per group and includes a histogram mode to visualize moisture variation at a glance.

We all know that taking moisture readings only from the edges and outer boards of a kiln pack doesn't tell us much about the moisture conditions deeper inside the stack. Before the mid-1990s, getting those deeper measurements was a significant challenge without separating the pack.

That's why Wagner developed its moisture meter and stack probe combination. This innovative solution made it possible to take hundreds of measurements deep inside kiln packs without having to separate them with a forklift. Over the past 20+ years, Wagner has sold thousands of this tool combination, and many of our customers have made it a trusted part of their quality control process.

So if you haven't yet experienced the efficiency benefits of the L5300 and L722 combo, we invite you to discover these perks for yourself!

Contact Wagner Meters today. We're here for you whenever you need us.

Respectfully,

Kirt Metcalf
