

WFP400

Professional Flooring Installer Package

The WFP400 Professional Flooring Installer Package provides everything you need for accurate moisture testing on concrete or wood floors, with relative readings available for other building materials. This is a complete flooring kit for flooring installers and building inspectors who require accurate moisture measurement tools for wood, as well as accurate testing capabilities for concrete slabs.

With the damage-free, easy-to-use technology of the MMC220 and the Rapid RH® Touch-n-Sense™ Easy Reader, monitoring moisture content has never been simpler or more reliable. The Rapid RH® DataMaster™ App (available for purchase for iOS and Android devices) with Smart Reader is also designed to protect data integrity for easy reporting and analysis on each concrete job site.
